

MUHAMMAD FURQAN

Frontend Software Engineer | AI & Full-Stack Developer

0322-7200433 | furqanzubair209@gmail.com | Lahore, Pakistan

[LinkedIn](#) | [GitHub](#) | [Portfolio](#) | [Fiverr](#) | [Upwork](#)

PROFESSIONAL SUMMARY

Computer Science undergraduate and freelance software engineer with hands-on experience building AI, machine learning, and full-stack web applications. Currently working as a Frontend AI Engineering Intern and Frontend Development Intern, applying modern frameworks and AI-assisted development workflows. Skilled in Python, C++, PHP, JavaScript, and SQL, with a track record of delivering 38+ end-to-end projects across web development, automation, and applied AI.

EXPERIENCE

Frontend AI Engineer — FlyRank AI

Internship • Jul 2026 – Aug 2026 • Remote

- Developed responsive, mobile-friendly interfaces using modern frontend technologies and Tailwind CSS
- Built reusable UI components and e-commerce-style pages with a focus on maintainability
- Leveraged AI-assisted tools to accelerate development, debugging, and testing workflows

Freelance Software Engineer — Upwork

Aug 2026 – Present • Remote

- Deliver end-to-end software development services across AI/ML, web development, and workflow automation
- Build prediction models, computer vision pipelines, intelligent agents, and n8n automation workflows
- Collaborate directly with international clients to scope, design, and ship production-ready solutions

Freelance Software Engineer — Fiverr

Aug 2026 – Present • Remote

- Develop full-stack applications using React, JavaScript, Tailwind CSS, PHP, and MySQL
- Deliver Python-based machine learning, computer vision, web scraping, and automation solutions
- Maintain a client-focused workflow with clear communication and on-time delivery

Frontend Development Intern — CodeAlpha

Internship • Aug 2026 • Remote

- Built responsive, interactive web pages using HTML, CSS, and JavaScript
- Wrote clean, maintainable frontend code following modern best practices

Web Development & Designing Intern — Oasis Infobyte

Internship • Jul 2026 – Aug 2026 • Remote

- Developed responsive interfaces using HTML, CSS, and vanilla JavaScript
- Ensured cross-browser compatibility and mobile-first design across all deliverables

Independent Software Developer — Self-Employed

Sep 2024 – Present

- Designed, developed, and released software tools, ML pipelines, and games across Python, C++, PHP, and JavaScript
- Managed the full project lifecycle from ideation and architecture to deployment and iteration

Home Tutor (Part-Time) — Self-Employed

Sep 2023 – Present

- Tutor students in Mathematics, Physics, and Computer Science
- Tailor lesson plans to individual learning styles to improve academic performance

KEY PROJECTS

CodeForge — LeetCode-Style DSA Platform (Flagship Project) | React 19, TypeScript, Vite, Tailwind CSS, Zustand, Monaco Editor, Node.js, Express.js, Docker

- Built a full-stack coding platform with 45 hand-crafted C++ problems across 9 topic areas, a Monaco-based editor with real g++ compilation, Run/Submit modes, hidden test cases, and detailed verdicts (Accepted, Wrong Answer, TLE, etc.); includes progress tracking, streaks, achievements, and analytics.

FurqanStore — Multi-Vendor E-Commerce Marketplace | *React, TypeScript, Node.js, Express, Prisma, MySQL, Socket.IO*

- Migrated a legacy PHP/MySQL app to a modern full-stack platform with Customer, Vendor, Admin, and Super Admin roles, JWT auth and RBAC, real-time inventory and notifications, and vendor commission management; fixed security gaps including password hashing, CORS, and stock race conditions.

Student Performance Prediction System | *Python, Scikit-learn, XGBoost, Pandas, Matplotlib*

- Built an ML model predicting exam performance on a 6,607-record dataset; compared multiple regression models and achieved $R^2 = 0.914$ with tuned XGBoost.

Face Mask Detection System | *Python, OpenCV, TensorFlow, MobileNet CNN*

- Developed real-time mask detection using a MobileNet-based CNN with webcam inference, CPU optimization, and audio/visual alerts.

n8n Restaurant AI Automation Workflow | *n8n, Gemini API, Google Sheets*

- Automated order management, inventory tracking, and sales reporting; integrated Gemini API with Google Sheets for real-time customer feedback analysis.

33 additional projects (AI Web Scraping Agent, ResumeAI, Furqan Chess Engine, Aether Weather App, Student Fee Management System, Modern Music Player, DSA implementations, and more) on [GitHub](#) and [portfolio](#).

EDUCATION

Bachelor of Science in Computer Science (BSCS) — The Superior University, Lahore 2024 – 2028 (Expected)

CGPA: 3.50 / 4.00

Intermediate in Computer Science (ICS) — Superior College, Lahore 2022 – 2024

Grade: A (923/1200)

Matriculation (Computer Science) — Government High School Awan Town, Lahore 2020 – 2022

Grade: A+ (1006/1100)

TECHNICAL SKILLS

- Languages: Python, C++, PHP, JavaScript, SQL, HTML5, CSS3
- AI/ML: Scikit-learn, TensorFlow, XGBoost, OpenCV, Pandas, NumPy
- Databases: MySQL, Microsoft SQL Server
- Tools & Platforms: Git, GitHub, VS Code, Postman, n8n, Gemini API, Google Sheets
- Concepts: Data Structures & Algorithms, Software Engineering, UML, REST APIs, Secure Authentication

CERTIFICATIONS

- Introduction to Responsible AI — Google Cloud Skills Boost (2026)
- Introduction to Generative AI — Google Cloud Skills Boost (2026)
- Introduction to Data Science — Cisco Networking Academy (2026)
- Artificial Intelligence Fundamentals — IBM (2026)
- Claude with Anthropic API — Anthropic Academy (2026)
- AI Fluency: Framework & Foundations — Anthropic Academy (2026)
- Claude Code 101 — Anthropic Academy (2026)
- Python Intermediate & C Intermediate — Sololearn (2026)
- SQL Intermediate & Data Analytics with AI — Sololearn (2026)

LANGUAGES

English (Fluent) • Urdu (Native) • Punjabi (Fluent)
